1. 2. The Second Applicant Company is engaged in the business of software solutions,

telecommunications and value added products, and information technology and areas connected therewith of data organization.

3. The rationale for the Scheme of Amalgamation is to acquire the ongoing business of the First Applicant Company as both the applicant companies were incorporated with the object of carrying out software solutions, telecommunications and value added products, and information technology and areas connected therewith of data organization as their business. Since both the applicants are engaged in the similar line of business, there will be most optimum utilization of facilities, reserves, financial, managerial, technological and marketing expertise, distribution networks, manpower and other resources which will be conducive to enhance the capability to face competition in the market more effectively, thereby strengthening further the market position and growth prospects. It would also lead to growth prospects for the personnel and organizations connected with these concerned Companies and thus it will be in the interest and for the welfare of the employees of the Companies concerned in these arrangements and will also be in the interest of the Public. The Amalgamated Company will be able to source and absorb new technology and its capacity to spend on Research and Development will be enhanced. It will also provide opportunities to introduce new products and access to the latest research based products. In order to expand the activities and to increase the product portfolio it is thought necessary and advantageous to combine the activities and operations of both the Companies. While combining the activities of the Transferor and Transferee Company in a single Company, it was felt advisable also to combine Transferor and Transferee Company which would help better working capital management and better administration of sales for the merged Company.
